Figure 1 is a schematic representation of the 12 genes and their organization in the 12.5 kb genomic region. The diagram shows 12 genes (1-12) with their exons represented by boxes and introns by lines. The genes are arranged in a cluster, with some overlapping. The 12.5 kb scale is indicated at the bottom.

This is in response to the United States Patent and Trademark Office Action mailed February 28, 2001, which response is being made before April 28, 2001 and for which no extension fee is due.

By said Action, attached herewith, the Examiner required drawings that complied with margin requirements. Applicant hereby complies with that requirement with the attached five sheets of drawings.

Respectfully submitted,

Ed Becker
